

Wonder on Earth

Background

In 2222, Earth was a wasteland due to unchecked pollution. The human race had to seek a new home among the stars. A group built a massive spacecraft to restore the planet. Upon their return, they faced ruins and smog-filled air, but they refused to give up. They started from scratch and began healing the planet slowly.

Some people may have seizures when exposed to certain visual images, including flashing lights or patterns in video games, even if they have no history of epilepsy. Seizures can cause symptoms like dizziness, visual changes, limb jerking, confusion, or loss of consciousness, which may result in injury. If you experience any of these symptoms, stop playing the game and seek medical attention. If you or your family members have a history of seizures or epilepsy, consult a doctor before playing the game.
